---	---	---

In accordance with the provisions of ČSN EN ISO/IEC 17025:2018, the head of the calibration laboratory announces the following quality policy:

- The philosophy of our Calibration Laboratory PG electronic s.r.o.; The calibration laboratory is to meet the requirements of the customers of our calibration laboratory with the guarantee of the highest quality and reliability of the calibration services provided with compliance with mutually agreed delivery dates, provided that the requirements of the ČSN EN ISO/IEC 17025:2018 standard are comprehensively met.
- Impartiality, credibility, objectivity and accurate adherence to the procedures specified in the quality management system documentation by achieving the prerequisites for recognition to act as an independent competent laboratory for the performance of calibration services in the range of calibrations of the field of electro high-voltage and multifunctional testers.
- The management of the calibration laboratory is committed to providing customers with high-level services and cooperating with them during calibrations in accordance with the requirements of the standard.
- The management of the calibration laboratory undertakes to permanently create prerequisites and conditions for the personnel and technical equipment of the calibration laboratory to be in accordance with the declared scope of the quality management system and to ensure laboratory activities with quality according to the requirements of ČSN EN ISO/IEC 17025:2018.
- The management of the calibration laboratory creates the prerequisites for increasing professional competence and creates personnel-professional prerequisites for the correct implementation of calibration activities.
- We will use deliveries and services only from approved and verified suppliers.
- The management of PG electronic s.r.o. will not influence the results of the calibrations and the employees of the calibration laboratory will not be required to take any action that could call into question their impartiality and independence.
- The management of the calibration laboratory shall prevent any tampering which could in any way endanger the quality and performance of the calibrations. Ensuring the validity of the results and thus their quality is binding for all employees of the calibration laboratory.
- All employees are obliged to follow the documentation of the calibration laboratory and, within the scope of their responsibilities, to propose measures with the aim of continuous improvement both in the field of quality management and in the field of professional competence and to prevent the repetition of non-conforming work.
